Education 🎓

San Antonio College - A.A.S. Web & Graphic Design - 2013
Red Hat Certified System Administrator - 2013

Skills 🪄

Software - Very proficient in Adobe Illustrator, Photoshop, InDesign, Premiere, After Effects and Edge Animate.

Development - Very proficient developing in front end. Can code in HTML5, CSS3, JQuery, Javascript and SVG.

Administration - Very proficient with various flavors of Linux Systems including RHEL, CentOS, Ubuntu and Fedora.

Professional Experience 💼

Rackspace Hosting
Job Title: UX Designer. [Feb. 2016 - Present]
I design page layouts, user interfaces, illustrations, icons, patterns for various elements on Rackspace.com. Assist in user experience improvements and designing as well as contributing to the company brand and style guide. I also provided font end development (html, css, scss, less, javascript, jquery, angular) to build and refactor UI elements and patterns, as well as rebuild layouts/components for A/B testing.

Job Title: Linux Systems Administrator. [Dec. 2012 - Jan. 2016]
Managed things like apache, nginx, mysql, basic networking, ssh, ftp, imap, pop, plesk, ssl, dns and various protocols, on dedicated and virtual linux servers.

Freelancer [Dec. 2011 - Present]
I currently design and code, static and dynamic, responsive sites and web applications. I also design graphics and illustrations for print, interactive and video content. This is more of a means to keep a healthy stream of projects under my belt than it is for profit.

New Generation Fellowship [Jan. 2012 - Mar. 2013]
Volunteer web content manager, print, graphic and web designer.
